“We rise by lifting others.”
– Robert Ingersoll
TY DANJUMA FOUNDATION
AT A GLANCE

Established in 2009 by General TY Danjuma GCON (Rtd), The TY Danjuma Foundation is a private indigenous grant-making philanthropic organisation committed to enhancing free access to community health care, improving the quality of education of children, and empowering communities across the country to reduce extreme poverty.

We are based in the Federal Capital Territory with State offices in Taraba and Edo.

VISION
A Nigeria where all people have access to quality, affordable health care, education, and opportunities to realize their potential.

MISSION
Enhancing quality of life for Nigerians by supporting initiatives that improve access to healthcare and educational opportunities.

Our Core Values

PROUDLY NIGERIAN AND SUSTAINABLE
We exemplify giving in Nigeria by Nigerians for Nigerians for the long-term development of the country.

LEARNING AND INNOVATION
We strive to be a learning organization using what lessons were learnt in every process and how these inform our policies and practice in grant-making.

RESPONSIVENESS AND SENSITIVITY
We continue to demonstrate responsiveness and high levels of sensitivity to local community health and education problems, issues, and realities in grant-making.

INTEGRITY AND ACCOUNTABILITY
We continue to uphold high levels of openness, transparency, honesty and efficiency in dealings within and outside the Foundation. We remain accountable to our partners and beneficiaries.

COMMUNITY PARTICIPATION AND GOVERNMENT ENGAGEMENT
We believe that genuine community participation and government engagement in project implementation along with collaboration of relevant stakeholders enhances ownership and sustainability of projects and valuable ideas espoused by projects.

MAIN GOALS
- Enhance community healthcare by providing free medical services to rural communities which lack adequate medical facilities.
- Improve the quality of education of children and young people (16 years and younger).
- Alleviate the extreme poverty in communities across the country by providing clean drinking water, and encouraging the education/empowerment of women.
Message from the Board Chairman

It gives me great pleasure to present the work of the Foundation in the last one year in this report. The Report details major activities embarked on to ensure that the vision and mission of the Foundation are met. In health, this year, the Foundation focused on providing free medical care, combating neglected tropical diseases, and providing support to internally displaced persons. In education, the Foundation promoted access to educational opportunities and empowered people living with disabilities.

Partnership is a valuable tool the Foundation uses to deliver on its mission so in partnership with Development Africa, a charity and international non-governmental organization, the Foundation built Rufkaa Danjuma Maternity to provide enhanced service delivery of maternal and perinatal healthcare to Taum Local Government and surrounding communities.

Going by the report, we are not yet where we aspire to be, but we are farther away from where we began. It is my desire that each year we move closer to our goals of a Nigeria where its citizens have equal access to opportunities that enable them to live a better life.

I wish to thank the Board of Trustees and staff of the Foundation for all the hard work and dedication, and especially our partners and grantees who have worked tirelessly to ensure that we are on the path of attaining the Foundation’s vision.
Message from the Chief Executive Officer

Dear Friends and Partners,

In 2017 the Foundation began implementation of its 5-year strategic plan which in line with its mission will improve access to quality healthcare and education for underserved communities by 2021.

Working with our partners, the Foundation was able to sponsor medical missions, provide succor to IDPs, deliver basic education to children, and offer skills training aimed at elevating the economic conditions of Nigerians in rural communities with limited means and opportunities. Testimonies of the extraordinary impact of the Foundation’s work in the lives of ordinary Nigerians keep rolling in and re-energizing the TYDF Team and its partners as we continue to advance in our quest for a better Nigeria and its citizens.

My profound thanks go out to our partners whose commitment to assisting the Foundation in realizing its vision is so important. I also want to thank the Board of Trustees of the Foundation for the support they constantly provide to the TYDF Team and its partners. Finally, I would like to thank the staff of the Foundation who continue to work tirelessly to ensure that the Foundation delivers on its mandate.

Lessons from the meeting informed the focus of the Foundation's interventions in Health, Education and skills training. Priority was given to providing Free Medical & Dental care including Eye & General Surgeries to underserved communities; and reducing the burden of Neglected Tropical Diseases. For Education and Skills Training, emphasis were on school feeding, adult literacy, and promoting girl child education especially in underserved communities. While the skills training component focused on providing livelihood skills and empowerment that would increase the income of people living with disabilities especially women and youths; implementing special programmes for IDPs that would improve their living conditions; improve their health and promote hygiene and sanitation.

Preparatory to the 2017 Call for Concept Notes, the Foundation organised a two-day brainstorming meeting of experts in the health and education sectors in Abuja. It was part of the planning process to develop the Foundation's annual Call for Concept Notes and it created an opportunity for peer-learning and experience sharing to deepen understanding of current challenges in the sectors, identify the most pressing needs in the areas of health, education & skills training; explore opportunities for the Foundation to collaboratively address needs at the grassroots, and highlight initiatives through which the Foundation can effectively respond to proven needs.

18 organizations were funded to implement initiatives that address the challenges mentioned above.

The Foundation is committed to ensuring access to quality health care in Nigeria and supports initiatives that promote quality health care services to disadvantaged Nigerians. This year, funding for health provided quality and free access to dental and eye care, general consultation and surgeries to Luvo IDPs camp and environs in Luvo LGA of Nasarawa State. Corrective surgery for people living with craniofacial deformities in Katsina state and Edo state, combating Neglected Tropical Diseases in Taraba state, supported IDPs with micronutrient based foods and general food items to displaced households at Shagari Low-Cost Housing B in Borno State, provided comprehensive free eye care to individuals and community members in Taraba States of Nigeria.

The Foundation’s aim for funding these projects was to contribute to combating Neglected Tropical Diseases, reducing preventable blindness, providing access to free health care, supporting internally displaced persons and combating malnutrition in under-five children living in IDP camps.

Free Medical Missions

Free medical mission is one of the ways the Foundation provides health care to underserved communities as well as address health issues that are sometimes neglected. The Foundation funded 3 organizations - Pro-Health International (PHI), Clèf Care Foundation and Care Vision Support Initiative (CAVISI) to take free health care to underserved communities in Nasarawa, Katsina, Taraba and Edo States.

The Free medical mission in Nasarawa state implemented by Pro-Health International improved the health status of Internally Displaced Persons in IDP camp at Luvu. It provided patients with dental care services, general outpatient consultations, laboratory services and eye care consultation. 2,421 IDPs benefited from the services offered. Four post outreach follow-up visits were carried out by the medical team to check on the patients at the IDP camp.

**FACT SHEET**

| **1200** | General outpatient consulted |
| **299**  | Dental cases consulted |
| **558**  | Laboratory tests done |
| **364**  | Eye care cases consulted |
| **10**   | Birth attendants were trained on safe delivery practices |
The Free medical mission at Federal Medical Center Katsina implemented by Cleft Care Foundation, addressed the prevalence of craniofacial deformities. The mission provided free facial deformities surgeries to repair 50 cases of several types of cranio-facial deformities. The mission also moved to Stella Obasanjo Hospital, Benin City, Edo state to complete treatment for outstanding patients that were screened but not treated in the 2016 grant cycle.

To reduce preventable blindness, the Foundation funded CAVSI to implement an integrated comprehensive free eye care mission aimed at increasing access and improving vision of 1000 individuals, community members and to also enhance capacity of 60 Community Health workers in primary eye care in Mutum-Biyu Community and environ of Gassol LGA of Taraba State.

The eye camp which took place at First Referral Hospital Mutum-Biyu provided screening, consultation and treatment of adults and children with varying eye problems. People with refractive error were identified and corrected.
Impact Story

Yusuf Aisha is 40 years old and suffered from a massive facial swelling for over a year. She had sought for both traditional and orthodox treatment, but was helpless because she had no financial aid to undergo surgery. She heard of the free medical mission at Federal Medical Center Katsina and came. She was successfully operated. She is doing well and grateful to God and the Foundation’s intervention.

Impact Story

My name is Dogara John, am deaf and one of the beneficiaries of the TY Danjuma Foundation Skills Training in 2017. I am presently an S.S. 3 Student of Government Technical College Malali Kaduna State. I come from a poor but humble background. My parents are extremely poor but they were determined to train me in school despite my disability.

During my training in shoe-making, I was focused and I ensured that no form of distraction from my peers will hinder me from achieving my dream of being a Shoe-maker. During my training, I made shoes for my school mates and I was paid 50% of the money which helped me in buying materials with assistance from my instructors. I made a total of N20,000.00 during the period of my training.

After my training, I was given start-up equipment and materials. I travelled to my village during the Christmas celebration. I served my customers in the comfort of my family residence where I made several shoes. I have saved over N45,000.00 within the past few months. My life has changed and my dream of being a shoe-maker is becoming a reality. All thanks to God and to TY Danjuma Foundation for giving us beneficiaries a platform to discover our potentials.
Food Support to IDPS in Borno

The ongoing insurgency continues to increase population displacements, restrict income generating opportunities, limit trade flows and escalate food prices in the northeast. The Foundation funded SWNII to distribute micro-nutrient based food and general food items to displaced households in IDP camp at Shagarai Low-Cost Housing B in Borno state. Malnourished children were identified and treated according to standard protocol to improve the nutritional status of the IDPs under five children.

955 households with a combined population of 4473 persons got food and non-food items while 2,148 under 5 children were screened and provided with vitamin A supplement and dewormed with Albendazole tablets. 1,867 women were trained on IYCF-E practices and how to prepare nutritious meals with food distributed to them to prevent malnutrition. 157 pregnant women were given Birth kits and multivitamins. Four children identified with Severe Acute Malnutrition cases were referred to a nearby UNICEF health facility at Shagarai Low-Cost Housing B and were successfully treated.

Combating NTDs

Nigeria has the highest Neglected Tropical Diseases (NTDs) burden in Africa, with an estimated 100 million people at risk for at least one NTDs. In 2013, the Federal Ministry of Health (FMoH) launched an ambitious plan to control or eliminate the seven most common NTDs by 2020.

The Foundation in helping to reach this goal, in the last 3 years, the Foundation has continued to provide funds for MITOSATH to reduce morbidity, disability and mortality due to NTDs in Taraba State among 1,593,407 people ages 5 years and above in the 12 endemic LGAs of Taraba State.

The project mobilizes and sensitizes people to increase NTDs awareness and administer drugs. In 2017, mass administration of medicine (MAM) for Schistosomiasis was done in Donga, Gashaka, Gassol, Kurmi, Jalingo and Takun LGAs in Taraba State. Mass administration of medicine for Onchocerciasis and Lymphatic Filariasis was also done in Kurmi, Gashaka, Wukari, Takum, Ussa, Donga, Bali, Ibi, Yorro, Jalingo, Sadauna and Ardo Kola LGAs in Taraba State.

Health workers, Teachers and Community Directed Distributors (CDDs) were also trained on mass administration of medicine (MAM) for Schistosomiasis and Onchocerciasis.

| **173,067** persons treated for Schistosomiasis in the 6 endemic LGAs |
| **1,732,662** persons received treated for Onchocerciasis in 12 LGAs |
| **1,878,023** persons received treated for Lymphatic Filariasis in all 13 endemic LGAs |
| **201,743** persons treated for Soil Transmitted Helminths (STH) with Albendazole during Lymphatic Filariasis intervention in the 5 LGAs |
Education

The goal of the Foundation in education is to improve the quality of education of children and young people. This year, the Foundation’s funding focused on enhancing the quality of education for children under 18 and improved access to livelihood training and support for persons living with disabilities.

Location: Kristal Education, Nigeria
Promoting Access to Educational Opportunities

- Community Development and Education Aid Initiative was funded to provide functional and remedial education to adolescent girls to complete basic education for self-reliance in Aliade, Gwer Local Government Area in Benue State. 141 adolescent girls were enrolled in school. This has improved the self-confidence and self-worth of the beneficiaries. To improve learning outcomes, 10 teachers were trained on classroom management and facilitation of adult literacy classes.

- To broaden the reach of technology and ICT education in Taraba State, Murtala Mohammed Foundation was funded to implement Computer for School Program aimed at reaching 5,400 students. The program provided a Zuba box which comprises of 10 computers and placed in Govt. Science Secondary School in Jalingo. The Zuba Box is also used by 5 neighboring schools and they take turns each day of the week to access the computer lab. This has facilitated the building of student’s capacities in computer appreciation and computer operating systems and the lab is also utilized by students for Jamb computer based practice.

School Feeding Programme

To increase retention and completion rate in primary school, the Foundation has continued funding for her school feeding programme in Dako UBE primary school, FCT and Fadama Primary School, Takum. The programme provides one meal a day to 604 pupils in both schools. This has increased access, retention and completion rate of pupils especially the girl child in the school. For the first time in the school, eight girls graduated from primary 6 in Dako. It also reduced hunger for pupils who attend school during school hours. The project has improved the hygiene practices of the pupils as pupils wash their hands daily before and after meals.
Empowering people living with disabilities & IDPs

Alkali Hussaini Foundation and Al Children Charity International Foundation (ACCIIF) where funded to provide Integrated Support for Education & Vocational Skills Development (IN-SEVC) for women in Argungu LGA, Kebbi State and career skills training for 143 hard of hearing (deaf) students in Government Technical College, Malali, Kaduna State. The project provided skills in tailoring, knitting, computer appreciation and shoe making. In all, 220 beneficiaries enrolled and graduated successfully from the project. In Kebbi state, the project has been replicated by the Kebbi State Government in setting up similar centres across the state. The TY Danjuma centre at Argungu is the coordinating point for all the other centres in the state. Similarly, following the Foundation’s work in Government Technical College Malali, the Kaduna State Government has adopted tailoring and shoemaking soft skills as part of the school curriculum and the school has also awarded the contract of sewing school’s uniforms to the Project beneficiaries.
Community Funds

The Community funds supports community organizations and local start-ups located in Taraba and Edo states in a bid to encourage micro developments at the grassroots. This is in line with the Foundation’s overall vision and mission while building the capacity of local organizations in the delivery of social services.

This year, the Foundation supported eight community-based organizations; Four each in Taraba and Edo States to intervene in maternal and child health, adult education, and community livelihood support.

Edo Community Fund

The Foundation’s grant strengthened palm oil production in Olenokhua community in Ewshimi Town in Esan South East L.G.A, by upgrading the existing palm oil mill funded by the Foundation in 2012. A high capacity palm fruit digester and diesel engine were purchased to boost processing at the mill. A water harvester was also constructed to ensure the availability of water at the mill.

To consolidate on the gains of Ugo Community cassava mill in Orhionmwon Local Government Area and increase access to cassava market, the Foundation grant supported the cassava mill with a Toyota Dyna Truck. It is hoped that members of Ugo Osasu Fadama III Cassava Farmers cooperative and other cassava farmers in the community will utilize the truck to convey cassava from their farms with ease and finished products can be conveyed to the market with ease. The cooperative will be able to produce garn in large quantity and make supplies to any part of Edo state and environs without any problem.
Through the Foundation’s grant, the capacity of Traditional Birth Attendants (TBAs) and Community Health Workers (CHWs) were built and strengthened for effective maternal health delivery. 24 TBAs and 10 CHWs were trained on the importance of antenatal clinic attendance, safety precautions, complications, danger signs in pregnancy and referral care of the newborn, treatment of common childhood diseases, family planning and immunization. The trained TBAs and CHWs received necessary materials for documentation of deliveries taken and referrals made, they also received delivery kits to ensure the safety of mother, child and care provider. Follow up meetings are periodically held with the trained group to ensure they are utilizing their newly acquired skills for the benefits of mothers and their babies.

In Education, the Foundation’s grant was used to enroll 82 students into adult literacy classes. The aim is to reduce illiteracy among adults in Ipinle, Ijirua community (Arviawa) in Etsako Central LGA, Edo. The literacy classes covered reading and writing, basic numeracy and vocational studies. 15 students wrote the NABTEB certificate exam while the post basic class students were enrolled for the primary six certificate exams.

Taraba Community Fund

In the 2017 grant cycle, the Foundation’s grant was used to improve the health status and living conditions of people living in the rural areas of Zing and Yorroro LGAs in Taraba through provision of an enabling environment that promote preventive and curative health care services to Pregnant women and Nursing Mothers, babies, and training of TBAs and Village Health Workers in Zing and Yorroro LGAs in Taraba. The Foundation in partnership with St Monica Health Centre Yakole, conducted community outreachs to provide free basic medical services to 1302 pregnant women and immunized 1500 children. They trained 10 TBAs and 10 Village Health Workers and conducted 153 scanning for pregnant women who were provided with free antenatal, post-natal and clinical services at the St Monica health Centre.

Women Trafficking and Child Labour Eradication Foundation (WOTCLEF) trained TBAs on universal safety measures and safe assisted delivery. They also created synergy between TBAs and Maternal Child Health centres for referrals and linkages that will contribute to the reduction in maternal and infant mortality rates in the community.

**FACT SHEET**

- 554 deliveries were recorded by the TBAs and reported to the nearest facility
- 1,357 women were referred to the nearest facility for PMTCT/ANC services
- 3,049 women were reached during our outreach on ANCP/MTCT awareness in churches, houses to house, Women group meetings
Adult Literacy

In Education, two Adult literacy projects were implemented by Deeper Peace and Unity Women Multipurpose Cooperative Society and Youth Progressive Association in Taraba (TYPA). In Jalingo, the Foundation’s grant was used to establish an adult literacy and vocational skills empowerment training centre for 400 adult male and females while in Takum LGA, the Foundation’s grant enhanced the quality of learning of 300 adults by establishing an adult literacy Centre and also provided relevant learning materials and skills training.

Discretionary Grants

The discretionary grants support prompt humanitarian response to emergencies and relevant short-term interventions that fall within the Foundation's areas of focus. Its overarching goal is to ensure responsiveness to legitimate needs that may arise before or after the annual call for concept notes. Projects funded under this grant generally fall within the Foundation's focus areas of health and education.

In 2017, the discretionary grants went into response to humanitarian needs, programme research, partnership and publicity.

**FACT SHEET**

Response to Humanitarian Crises and Support to Internally Displaced Persons (IDP)

- More than 6,000 people were displaced in Takum, Ussa, and Bari Local Government Areas because of the Herdsmen and farmer crises. The attack left over 31 people dead, property worth millions destroyed and a huge humanitarian crisis. The Foundation responded swiftly by providing food items to over 5,000 displaced people. The Foundation worked with the Taraba State Government Relief Committee and the affected communities to carry out the intervention. The intervention was based on a needs assessment carried out in conjunction with the Taraba state Emergency Management Agency and the Takum Local Government Council. The Foundation provided assorted food items to the displaced people. All items were sourced locally to strengthen the local economy.

- In Benue state, the Foundation’s Grant supported people displaced in Makurdi, because of flood that occurred in October/November 2017. The International Market Camp for Internally Displaced Persons in Makurdi Benue State played host to about 5,000 IDPs and there was an urgent need to increase access to safe drinking water, sanitation and hygiene facilities as the facilities on ground have been overstretched due to the high number of IDPs. The Foundation responded to this need by providing water, disinfectants and training IDPs on WASH.

- At the Wassa IDP Camp in the Federal Capital Territory the Foundation worked in partnership with Pathfinder International for distribution of relief materials to IDPs at Wassa community of FCT.

Research & Development

As a core value, the Foundation strives to be a learning organization, asking what lessons were learnt in every process and how they can inform our policies and practice in grant-making. This year, the Foundation worked with Nigerian Health Watch to conduct a research that would identify key priority for government and relevant stakeholders in the health and education & skills training. It was hoped that the findings of the research work would guide the Foundation in making informed decisions on narrowing down the focus areas.

In line with learning, the foundation also worked with Mekasy Nigeria Limited to increase the capacity of staff on GIS mapping to help staff effectively document and project the work of the Foundation in a graphical manner.
Partnerships & Collaborations

TY Danjuma Foundation seeks collaboration and partnership with other grant makers, national, regional and international organisations with similar interests and values. It is a valuable tool for the Foundation to deploy for expanding reach and leveraging on additional resources, both human and material to improve impact.

TY Danjuma Foundation’s partnership and collaborations initiative is intended to improve coalition and knowledge building through joint initiatives with likeminded organisations, partner resourcing and solidarity action in order to grow and deepen philanthropy and the philanthropic literature in Nigeria.

In 2017, the foundation partnered Channels International Kids Cup, Nigerian Health Watch and Development Africa.

Future of Health Conference

The Future of Health Conference series is the flagship event of “Nigeria Health Watch”, a health policy advocacy organisation on health in Nigeria. The Foundation provided grants to support the organization of the 2017 Future of Health Conference titled “The Business of Health”. The Business of Health Conference brought together key players in the health sector to explore the business of health in Nigeria and how it can drive some of the improvements that the sector desperately needs in promoting quality health care to Nigerians in underserved communities.
Rufkatu Danjuma Maternity

In line with its vision of providing access to quality health care delivery, the TY Danjuma Foundation collaborated with Development Africa, a charity and international non-governmental organization to develop a modern, sustainable, and specialized mother and child facility in Takum Local Government, Taraba State.

The project commenced on October 24, 2016 and is situated on a 6-hectare land provided by the Taraba State Government, located opposite Government Day secondary School along Takum-Lupwe road.

The primary aim of the RDM Centre is to provide enhanced service delivery of maternal and perinatal healthcare to Takum Local Government and surrounding communities. The Centre will strengthen already existing health systems within the Local Government and the state as a whole by providing the following services: maternal and child care, family planning, control of sexually transmitted infections, and management of common diseases in adults and children. In addition, the RDM boasts of a 24-hour ambulance service.

The Center has residential quarters for doctors and nurses to ensure the availability of health personnel at the Center 24 hours a day. It also has a solar system to provide power backup to RDM. The facility also boasts of an industrial borehole, with an attached water treatment facility.
This project will not only contribute to addressing the challenges of maternal and child mortality and morbidity in and around Takum, it will also impact positively on the socio economic situation of the people in Takum by providing an estimated 100 direct job opportunities.

TY Danjuma Foundation since 2009 has continued to invest resources in Taraba state to improve health care and strengthen healthcare services. This project is a step towards reducing infant and maternal mortality rate in Nigeria.

Impact Story

The Rufkatu Danjuma Maternity (RDM) began operation on 19th of December 2017 to provide enhanced service delivery of maternal and perinatal healthcare to Takum Local Government and surrounding communities with amazing results.

By the first quarter of 2018, the RDM had registered 863 patients and successfully taken 98 deliveries, provided antenatal services to 554 patients and attended to 204 admitted patients.

It is hoped that the RDM will continue to address the challenges of maternal and child mortality and morbidity.

**FIRST BABY (GIRL)** BORN 12:40am on the 20th December 2017

Channels International Kids Cup

For the second year running, the foundation partnered with Channels International Kids Cup organized by Channels TV. The Foundation awarded a cumulative grant of N4.5m to the top 3 winning schools at the 2017 Edition of the Channels International Kids cup hosted in Lagos from 22nd – 27th of May 2017.

African Church Central School Onibuku-Ota, Ogun State, Buhunudeen LGEA Primary School, Kwara State, and Xpander School Ikotodu, Lagos who came first, second and third got N2m, N1.5m and N1m respectively. The grant is aimed at enhancing the quality of education by providing funds the schools can use to develop critical infrastructure in their schools. Buhunudeen LGEA Primary School, Kwara State used their grant to set up the first library in the school while Xpander School Ikotodu, Lagos used their grant to improve their sport facilities in the school.

The Channels International Kids Cup is an annual football competition for primary school pupils in Nigeria and West Africa hosted by Channels TV and partners to celebrate the talents of children in commemoration of Children’s Day. The Foundation is pleased to be a partner on this success story.
